ADDENDUM NO. 2

HOME BLEACHERS

LITTLE JOB #612-12353-10

DSA: A# 03-120515 File #56-H4

Rio Mesa High School
545 Central Avenue
Oxnard, CA 93036

September 8, 2020

LITTLE
1300 Dove Street, Suite 100
Newport Beach, CA 92660

Architect- Jay R. Tittle, C- 12955

1. PART 1 - GENERAL

1.1. The following revisions and/or clarifications shall be made to the Bidding Requirements and Contract Documents. Revise and amend the Documents for the above named project in accordance with this Addendum. The bid shall reflect these addendum changes and each bidder shall make reference in their bid to this addendum.

1.2. All Bidding Requirements and Contract Documents shall apply to this addendum as originally indicated in the applicable portions of the Contract Documents, unless otherwise modified by this addendum.

1.2.1. Previous Addendum #1 issued August 04, 2020.

1.3. GENERAL CLARIFICATIONS

1.3.1. The following clarifications are issued to all bidders as information for use in preparing bids:

1.3.1.1. This being the last Addenda issued; bidders should take note that 9/8/2020 was the last date for bidders to ask questions and have them answered prior to bid.

1.3.1.2. Work Completion date for RMHS Home Bleachers to be on **02/18/2021**.

1.3.1.3. The Stadium Renovation project under construction, by Byrom-Davey, Inc, has the following current milestone dates in their Project Schedule which Bidders for this Project should be aware of:

1.3.1.3.1. Stadium Lighting completion on December 03, 2020.

1.3.1.3.2. Overall Project completion on March 01, 2021.

1.3.1.4. Bid Bond is required PER SCHOOL SITE. If the Contractor is bidding on both sites, then (2) Bid Bonds (hard copies) should be submitted by bid due date and time.

1.3.1.5. The foundations designed/shown on the DSA-approved Bleachers plans for Rio Mesa High School are classified as 'conventional pad footings' with required subgrade prep as noted in the soils report.

2. PART 3 – DRAWINGS

2.1. GENERAL DRAWINGS ISSUED

2.1.1. Narrative changes to General Drawings are issued as follows:

2.1.1.1. Drawing G0.1.1 - Modify as follows:

2.1.1.1.1. Sheet Index – Audio Visual; Add the following sheets:

2.1.1.1.1.1. AV0.1 GENERAL NOTES AND SHEET INDEX

2.1.1.1.1.2. AV0.2 ABBREVIATIONS NOTES AND SYMBOLS

2.1.1.1.1.3. AV1.1 ENLARGED AV SITE PLAN

2.1.1.1.1.4. AV1.5 AV ENLARGED LAYOUTS

2.1.1.1.1.5. AV4.0 WIRING SCHEME AND SYMBOL KEY

2.1.1.1.1.6. AV4.1 AV ONELINE DIAGRAM

2.1.1.1.1.7. AV5.0 AV TYPICAL SEISMIC AND GROUNDING DETAILS

2.1.1.1.1.8. AV6.3 AV DETAILS

2.2. SOUTHERN BLEACHERS COMPANY DRAWINGS ISSUED

2.2.1. Narrative clarification to Southern Bleachers Drawings are issued as follows:

2.2.1.1. Drawing B26 – Press Box Layout

2.2.1.1.1. The flush mounted conduits and device boxes are provided per AV and FA drawings. Devices, wire, and surface mounted conduits are to be installed by the appropriate trades. Junction boxes are provided below the counter on the front wall. The 4x4x2-1/8", single gang box at 18" AFF with a ¾" C stubbed out the bottom of the building.

2.3. ELECTRICAL DRAWINGS ISSUED

2.3.1. The following Addendum ("AD") Drawings, marked Delta 2, are issued:

2.3.1.1. Drawing E-202: Revise currently issued Drawing per AD2-E1.

2.4. AUDIO VISUAL DRAWINGS ISSUED

2.4.1. The following Addendum ("AD") Drawings, marked Delta 2, are issued:

2.4.1.1. Drawing (AV0.1) AD2-AV1: New Sheet.

2.4.1.2. Drawing (AV0.2) AD2-AV2: New Sheet.

2.4.1.3. Drawing (AV1.1) AD2-AV3: New Sheet.

2.4.1.4. Drawing (AV1.5) AD2-AV4: New Sheet.

2.4.1.5. Drawing (AV4.0) AD2-AV5: New Sheet.

2.4.1.6. Drawing (AV4.1) AD2-AV6: New Sheet.

2.4.1.7. Drawing (AV5.0) AD2-AV7: New Sheet.

2.4.1.8. Drawing (AV6.3) AD2-AV8: New Sheet.

2.4.2. Narrative clarification to Audio Visual Drawings are issued as follows:

2.4.2.1. Audio Visual Scope of Work clarification:

2.4.2.1.1. Contractor shall visit project site to assess the condition of all existing football stadium audio equipment. They shall provide a report stating their findings and identify any nonfunctioning equipment. If the Contractor finds that any part of the existing system is not functioning, they shall report this to the Client. The Client will make arrangement to have the system repaired and reschedule the Contractor to revisit the site to confirm all equipment is functional. Once all equipment is functional, the Contractor shall provide a report to the Client confirming that all equipment is in working condition.

2.4.2.1.2. The Contractor shall then remove all audio system equipment including but not limited to Equipment Rack, Announcer Microphone, System Control Interface, Wireless Microphone and Assistive Listening Antennas, Audio Input Panel and System Infrastructure. All equipment is to be stored in a secure storage space until the new press box is built. Contractor shall then reinstall all stored equipment in the new press box per the AV drawings and confirm that the system is fully functional. Once the system is fully functional, the Contractor shall demonstrate the working system to the client.

END OF ADDENDUM #2

Enclosures:

I) New full-size Drawings Issued:
   a) Drawings AD2-AV1 through AD2-AV8, Delta 2.

II) New 11 x 17 Drawings Issued:
   a) Drawing AD2-E1, Delta 2.

PRESS BOX ELECTRICAL FLOOR PLAN | SCALE: 3/8"=1'-0" | 1

RIO MESA HIGH SCHOOL STADIUM SOUND SYSTEM

OXNARD UNION HIGH SCHOOL DISTRICT

OXNARD, CA

GENERAL NOTES

REFER TO AUDIO VISUAL SPECIFICATION SECTION FOR COMPLETE REQUIREMENTS

1. ELECTRICAL

   A. All conduits, junction boxes, back boxes, pull string and power outlets by Division 26 contractor as required.
   B. All power to AV equipment to originate from dedicated audio video load center in accordance with the latest local and national codes referencing "technical power systems", NEC Article 640.
   C. Branch circuits feeding audio-visual equipment must not originate from load centers connected to inductive loads.
   D. Provide all AV circuits with isolated ground, dedicated neutral.

2. COORDINATE

   A. Coordinate with the work of all sections. Coordinate the location of blocking and backing required by this section. Make reasonable minor adjustments to preserve architectural symmetry and alignment with adjacent features at no claim for additional cost or time. Present conflicts in timely manner for resolution.
   B. Relocation, revision or correction caused by failure of the contractor to coordinate the work shall not be subject to claim for additional cost or time.
   C. Power receptacles shown on the AV drawings outside of equipment racks are shown for coordination information only. Refer to Division 26 documents for construction.
   D. These drawings show scope. The exact location & elevations of loudspeakers, receptacles and devices must be coordinated with the architectural drawings.
   E. Conduit, back boxes and pull boxes supplied and installed by electrical contractor under supervision of AV contractor.
   F. General contractor shall coordinate the conduit, devices, pathways and junction boxes for the AV system with other trade to avoid any conflicts.

3. LOCATIONS AND DIMENSIONS

   A. Locations and dimensions shown on architectural drawings take precedence over these AV drawings. In case of apparent conflict or ambiguity, submit to the Architect in timely manner for resolution.
   B. Dimensions take precedence over scale. Large scale drawings take precedence over small. Report all conflicts before installation.
   C. Unless otherwise noted, dimensions are shown height x width x depth.
   D. Verify all dimensions, locations and conditions in the field prior to starting work. Notify Architect of any apparent discrepancies.

4. SUPPORT

   Provide all blocking, bridging, ties, fasteners and related support provisions for all work of this section. Comply with applicable code requirements for means of support of electrical equipment of the same weight under the same mounting conditions. Do not apply any load to building structure without first obtaining written approval of the project Structural Engineer. Obtain per project procedures. Supports for raceway system by Division 26 contractor.

5. BOX, PANEL AND ENCLOSURE INSTALLATION

   A. Coordinate the location of all boxes, panels, enclosures and related raceway with the work of other sections.
   B. Verify access to boxes, panels and enclosures comply with applicable code.
   C. Coordinate and correct all conditions of occlusion of all loudspeaker assemblies. Where more than one (1) flush mounted ceiling loudspeaker has been scheduled, none shall be located closer to any fixed wall than one-half (1/2) of the adjacent clear height, except at ceiling discontinuities, or where specifically shown on the drawings.
   D. Install boxes, panels and enclosures square and plumb. Set flush mounted units so that the face of the cover, Bezel or Escutcheon, is in the same plane as the surrounding finished surface. Mount boxes, panels and trim so that there are no gaps, cracks or obvious lines between the trim and the adjacent finished surface.
   E. Unless otherwise noted, provide steel boxes, panels and enclosures. Comply with Division 26 requirements and applicable code.
   F. Unless otherwise noted, boxes and enclosures shall be not less than 2-1/8 inches deep. Provide the larger of the size required by applicable code or as shown on drawings. Coordinate wire and cable bend radius with box and enclosure size.
   G. Pull boxes: Provide as required by the most restrictive of applicable code or the provisions of Division 26. Coordinate with wire and cable bend radius.
   H. Provide required fire rated junction boxes or fire stop box guards at all fire rated walls.

6. RACEWAY

   A. For all work of this section, raceway above ground shall be EMT, raceway below ground shall be PVC.
   B. Raceway shall be ¾ inch diameter trade size unless otherwise noted.
   C. All conduit runs over 100 ft. must have large radius bends.
   D. A maximum of two 90 degree elbows in each conduit run.
   E. Conduit with fiber optic cable installed, must conform to the minimum bend radius as specified by the manufacturer of the cable. Division 26 contractor is to apply radius bends where needed. Fiber bend radius shall be a minimum long-term low-stress radius not less than 20 times the cable diameter.
   F. Keep a minimum of 12" clear between electrical conduit and low voltage conduit.
   G. Provide fire rated conduit penetration seals at all fire rated walls.
   H. Conduit and accessories must be installed plumb and true with uniform fastening, fully dressed and finished.

7. GROUNDING AND BONDING

   Comply with all applicable codes and ordinances.
   Refer to National Electrical Code Section 250.

   A. Bond raceway and related boxes, panels, enclosures and cabinets as required by applicable code and Division 26.
   B. Make raceway connections to equipment racks and similar equipment enclosures containing powered equipment with isolated fittings.
   C. Ground and bond equipment racks and similar equipment enclosures containing powered equipment exclusively via the isolated equipment grounding conductors provided under Division 26. Size such conductors according to applicable code. For each technical branch circuit, the isolated equipment grounding conductor shall be copper of the same gauge as supply and neutral conductors. Main isolated equipment grounding conductor to each ensemble of equipment racks shall be copper, sized as required by applicable code.
   D. D.C. resistance between the isolated equipment grounding bus at equipment room technical power panels and the main project ground field shall not exceed 0.15 OHMS.
   E. For community antenna television and master antenna television systems and related provisions, comply with Article 800, National Electrical Code.

8. CABLE AND WIRE

   A. All low voltage cable and wire by Audio-Visual Contractor.
   B. Use plenum rated wire where required by code.
   C. Cable splicing not allowed in any pullboxes.

9. GENERAL

   A. In the event that these plans, notes or details or any part or portion thereof are used by any third-party without the express authorized permission of VENEKLASEN ASSOCIATES, the unauthorized user and anyone benefiting therefrom, shall defend, indemnify and hold harmless VENEKLASEN ASSOCIATES and its Agents, Principals, Employees and Consultants from and against any and all claims, including attorneys' fees arising out of said unauthorized use.
   B. Furthermore, the unauthorized use of these plans, notes, details or any part or portion therefore is expressly prohibited and VENEKLASEN ASSOCIATES retains a copyright over any and all documents prepared by VENEKLASEN ASSOCIATES.
   C. In the event that the installer deviates from the plans and specifications prepared by VENEKLASEN ASSOCIATES which results in damage to persons or property of any kind, Installer hereby agrees to defend, indemnify and hold harmless VENEKLASEN ASSOCIATES, its Agents, Principals, Employees and Consultants from and against any and all claims, including attorneys' fees caused by such failure to follow the plans and specifications prepared by VENEKLASEN ASSOCIATES, excepting only the damages to persons or property which are caused by the sole negligence or willful misconduct of VENEKLASEN ASSOCIATES.
   D. Drawings are diagrammatic and are intended to convey Scope of Work and to indicate general arrangement. There are not intended to show every detail including offset or fitting or every structural difficulty that may be encountered during the work. Except as otherwise indicated, locations of items are approximate only. Exact locations necessary to secure proper conditions and results must be determined at project site and must be approved by the Owner's representative.
   E. Except as otherwise indicated, make reasonable modifications in layout as needed to prevent conflict with other work or proper execution of work.
   F. Include work not usually shown or specified, but necessary for proper installation and operation of a system or piece of equipment in work.

BOX SCHEDULE

DEVICE ID	DESCRIPTION	BOX TYPE	BOX SIZE	INSTALL METHOD	ELEVATION
AIP/PSQ	AUDIO INPUT PANEL AND POWER SEQUENCER JUNCTION BOX	FSR WB-4G WITH COVER & KEY	8.9 x 8.9 x 3.75	WALL	8" ABOVE COUNTER
ALA	ASSISTIVE LISTENING ANTENNA	N/A	N/A	CEILING	N/A
ERK1	EQUIPMENT RACK	N/A	N/A	WALL	N/A
JB#	JUNCTION BOX	HANDHOLE BUILT INTO POLE BRACKET	N/A	INTEGRATED IN POLE BRACKET	SEE DETAIL ON AV6.1 AND AV6.2
WMA	WIRELESS MIC ANTENNA	N/A	N/A	CEILING	N/A

NOTE: CONTRACTOR IS TO PROVIDE BLANK PANELS FOR ALL BOXES THAT ARE DESIGNATED FOR FUTURE USE. BOXES THAT ARE ABLE TO ACCEPT STANDARD SIZE BLANK PANELS SHALL BE PROVIDED WITH SAME (SGMR, 2GMR, SWITCH BOXES, ETC). NON STANDARD SIZE BOXES (I.E. TOUCH PANELS) WILL BE PROVIDED WITH ANODIZED ALUMINUM BLANK PANELS. SEE SPECIFICATION FOR REQUIREMENTS (I.E. COLOR COORDINATION). CONTRACTOR TO LABEL ALL CONDUIT STUBS AND FUTURE BACK BOXES WITH PERMANENT MARKER. SEE SPECIFICATION FOR DETAILS.
